Immunogenetics

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA:

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U. S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0093-7711, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

 Germline 91
 Germline-joined 234, 415
 Glycan 381

G protein-coupled receptor 64
 Grene structure 77

H2 44
H2 381
H2⁹⁷ 218
 Haplotype 6
 Heat-shock protein 468
 Helper T lymphocytes 310
 Hemapoietic development 336
 Hemochromatosis 174, 404
 Hemolin 283
HFE 174, 404
 Histocompatibility 44, 310, 381
 Historecognition 468
 HIV 390
HLA 17, 30, 37, 371
 HLA 131, 398, 404
 HLA association 451
 HLA-B*1537 501
 HLA-B27 103
 HLA-B35 256
 HLA-B51 256
 HLA-B serology 501
HLA class I 297
 HLA-class I 149, 256
 HLA class Ib 139
 HLA-DQ 411
 HLA-DR antigens 310
 HLA polymorphism 501
H2-M Region 264
HTEX4 491
 Human 131, 442
 Hybrid sequences 55

 I-A^{g7} 411
 IDDM 411
 IFN- γ 332
Ig 226
 IgE hyperproduction 88
IL11 499
 IL-6 332
 Immunogenetics 44
 Immunoglobulin 73, 183, 272
 Immunoglobulin repertoire 91
 Immunoglobulins 355
 Influenza 206
 Interferon- γ 297
 Interleukin 11 499
 Interleukin 16 390
 Interleukin-2 310
